Assignment Week 3, Period 1 (15-09/19-09)

Name __Michael Obeng Boateng_____

Date __9/21/2025_____

Go to this week's power point, to the slides 8 -14 about the learning outcome(s).

1. Download this document and answer the questions here under
2. When finished, upload your assignment on Blackboard, in your Portfolio
3. **Deadline: 21-09, at 23:59**

GENERIC LEARNING OUTCOME: PERSONAL LEADERSHIP

1. **What is meant by Personal Leadership? Hint: it is definitely not about being a good team leader.**
2. **What needs attention or action regarding development of your personal leadership?**

Your answer:

Personal leadership is about taking responsibility for your own growth, choices, and direction in life. It means being aware of your strengths and weaknesses, setting personal goals, and making conscious decisions that align with your values. It is not about leading others, but about leading yourself in the right direction.

I need to focus on improving my time management and self-discipline. Sometimes I find it difficult to prioritize tasks effectively, so working on planning skills and staying consistent with my goals will strengthen my personal leadership. Also, I want to develop more self-reflection, so I can better understand my decisions and improve step by step.

GENERIC LEARNING OUTCOME: RESEARCH

What do you think, will research only be limited to the action described in slide 12?

Motivate your answer

Your answer:

No, research will not be limited to just one type of action. Research can take many forms: gathering information, testing ideas, analyzing data, reflecting on results, and applying insights in practice. It is a continuous process that supports problem-solving and innovation. Limiting research to one action would make it incomplete, because good research often combines different methods and perspective

GENERIC LEARNING OUTCOME: ETHICS AND PROJECT BASED WORKING

With the overwhelming rise of AI nowadays, and the dilemmas it brings, describe why ethics becomes increasingly important

Your answer:

Ethics is crucial because AI affects people's lives in powerful ways, from privacy to job security to decision-making. Without ethical guidelines, AI can create unfairness, bias, or harm society. For example, if AI systems are trained on biased data, they may discriminate without people noticing. Ethics helps ensure that technology is used responsibly, fairly, and in line with human values. In project-based work, this means always asking

GENERIC LEARNING OUTCOME: COMMUNICATION

A wise man once said: "Collaboration equals Communication"

Explain what is meant by this slogan.

Do you agree with this, or not? In both cases elaborate on your answer

Your answer:

The slogan means that successful collaboration is only possible when there is clear, open, and effective communication between team members. Without communication, ideas cannot be shared, tasks may not be clear, and misunderstandings can block progress. I agree with this statement, because communication is the foundation of teamwork. If everyone communicates well, problems can be solved faster, and the team can stay motivated and aligned. However, I also think collaboration requires trust and commitment in addition to communication, so it is not the *only* factor, but it is definitely the most important one.
